

Huaiyu Wei

Los Angeles, CA | hywei@atmos.ucla.edu | (310) 696-3887

[My website](#) | [Google Scholar](#) | [ResearchGate](#) | [GitHub](#)

Employment

University of California, Los Angeles (UCLA) Feb. 2024 – Present
Postdoctoral Researcher
Mentors: Andrew L. Stewart & James C. McWilliams

Education

The Hong Kong University of Science and Technology (HKUST) Aug. 2019 – Feb. 2024
Ph.D. in Marine Environmental Science, Advisor: Yan Wang
Thesis: Parameterizing mesoscale eddy fluxes across continental slopes

Sun Yat-sen University (SYSU) Sep. 2015 – July 2019
B.S. in Physical Oceanography, Advisor: Zhan Hu
Thesis: Laboratory study on wave dissipation by vegetation in combined current wave flow

Boston University May 2023 – Aug. 2023
Visiting student, Advisor: Xiaozhou Ruan

University of British Columbia July 2017 – Aug. 2017
Summer Program on Ocean and Atmosphere Systems

Research Interests

Geophysical fluid dynamics (GFD); Eddy parameterization; Eddy-topography interaction; Meridional overturning circulation; Bottom boundary layer mixing; Machine learning

Preprints

-
1. **Wei, H.**, Stewart, A. L., Medvedev, A., Srinivasan, K., Solodoch, A., Manucharyan, G., & Hogg, A. Satellite monitoring of global ocean overturning circulation enabled by deep learning. *Submitted*. (Preprint available upon request).
 2. Medvedev, A., **Wei, H.**, Armour, K., Srinivasan, K., Solodoch, A., & Stewart, A. Basin-wide sea-surface observations reveal post-2000 emergence of AMOC weakening. *Submitted*. (Preprint available at <https://essopenarchive.org/doi/full/10.22541/essoar.15002298/v1>).

Publications

-
1. **Wei, H.**, Stewart, A. L., McWilliams, J. C., & Capó, E. (2026). Formation of abyssal downwelling-favorable prograde flows via mesoscale eddy potential vorticity mixing. *Journal of Physical Oceanography*, e250196. doi.org/10.1175/JPO-D-25-0196.1.
 2. **Wei, H.**, Srinivasan, K., Stewart, A. L., Solodoch, A., Manucharyan, G., & Hogg, A. (2025). Full-depth reconstruction of long-term meridional overturning circulation variability from satellite-measurable quantities via machine learning. *Journal of Advances in Modeling Earth Systems*, 17(7), e2024MS004915. doi.org/10.1029/2024MS004915.

Research Support & Proposals

“Mesoscale eddy-mediated diapycnal upwelling in the ocean’s sloping bottom boundary layers” NSF proposal (Physical Oceanography Program) PI: Huaiyu Wei, Co-PIs: Andrew Stewart, Jim McWilliams, Henri Drake.	Submitted
“Leveraging machine learning and satellite measurements to predict ocean meridional overturning circulation” NSF ACCESS Explore project (EES240055). Postgraduate Studentship, HKUST	2024-2026 2019-2024

Talks & Seminars

1. “Formation of abyssal prograde flows via eddy potential vorticity mixing”, UC Irvine, 29th July 2025.
2. “Reconstructing meridional overturning circulation from satellite measurements via neural networks”, Boston University (20th Dec. 2024), MIT (3rd Jan. 2025), UCLA AOS department Seminar (19th Feb. 2025), and SNAP seminar (24th Feb. 2025).
3. “Parameterizing eddy mixing across continental slopes under upwelling-favorable winds”, Marine Center Spring Meeting, UCLA, 9th May 2024.
4. “Parameterizing isopycnal eddy mixing across continental slopes”, AOS Ocean Seminar, UCLA, 9th Apr. 2024.

Conference Presentations & Workshops

Ocean Sciences Meeting 2026 , Glasgow, Scotland, UK Oral presentation: “Mesoscale eddy potential vorticity mixing drives abyssal prograde along-isobath circulation”	Feb. 2026
NCAR Regional Ocean Modeling Workshop , Boulder, CO, US. Regional ocean modeling with MOM6 in the Community Earth System Model framework	Oct. 2025
California GFD Meeting 2025 , UCSB, CA, US. Organizing Committee & Oral presentation: “Eddy potential vorticity mixing drives abyssal prograde along-isobath circulation”	Sept. 2025
Climate Process Team Meeting 2025 , NYU/online, US. Oral presentation: “Formation of abyssal prograde flows via mesoscale eddy potential vorticity mixing”	Aug. 2025
AGU 2024 , Washington, DC, US. Oral presentation: “Reconstructing meridional overturning circulation from satellite measurements via Neural Networks”	Dec. 2024
Ocean Sciences Meeting 2024 , New Orleans, US eLightning presentation: “Parameterizing eddy buoyancy fluxes across prograde shelf/slope fronts	Feb. 2024

using a slope-aware GEOMETRIC closure”

Ocean Transport and Eddy Energy Meeting 2023, WHOI, US

May 2023

Oral presentation: “Parameterization for eddy buoyancy fluxes across prograde shelf/slope fronts”

Ocean Sciences Meeting 2022, Online

Mar. 2022

Oral presentation: “Full-depth scalings for isopycnal eddy mixing across continental slopes under upwelling-favorable winds”

EGU 2018, Vienna, Austria

Apr. 2018

Poster presentation: “The pattern and control of erodibility of cohesive sediments in a *Spartina alterniflora* marsh on the coast of Jiangsu, China”

Selected Awards

Richard P. and Linda S. Turco Exceptional Research Publication Award, UCLA

2026

Chancellor’s Award for Postdoctoral Research nominee, UCLA

2025

RedBird Academic Excellence Award, HKUST

2023

Best Presentation Award, HKUST Postgraduate Seminar

2023

Outstanding Graduate, SYSU

2019

National Scholarship, China (Top 1%)

2018

The Giordano Scholarship, SYSU (Top 2%)

2017

The Coca-Cola Scholarship for Outstanding Students, SYSU (Top 5%)

2016

Teaching Experience

Guest lecturer in graduate GFD at UCLA - Baroclinic instability

2025

Guest lecturer in undergraduate Physical Oceanography at UCLA - Density

2025

Guest lecturer in undergraduate Physical Oceanography at UCLA - Tides

2024

Teaching assistant at HKUST

2020-2023

Additional Information

Year of birth: 1997.

Language Skills: Mandarin (Native), English (IELTS score: 7.5).

Computer programming: Fortran, MATLAB, Python.

Journal reviewer: Communications Earth & Environment, Geophysical Research Letters, Journal of Advances in Modeling Earth Systems, Journal of Geophysical Research: Oceans, Journal of Physical Oceanography, Nature Communications, Ocean Modelling.
